

Environmental Trading

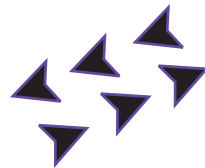

1 
Companies enter in the SIG all the data pertaining to industrial residues and hazardous waste

2 
SIG's module **prepare and print** reports and **transmit** data electronically to authorities in the requisite format, ensuring regulatory compliance

3 
The **Control Panel** transmit to the trader all the necessary information for the exchange of industrial residues

4 
Professional traders provide supports, encourage exchanges, and work actively in the search for treatment and valorization of industrial residues

5 
The data collected by the Control Panel allows to group the environmental services, to combine SME's efforts to Green House Gaz reduction and to exchange and communicate with other industrial parks in the world
